

SAFETY IN MOTION: The best is saved for last

15th International Motorcycle Conference in December

Essen (ifz, Germany) The focus lies on motorcycle safety. For the Institute for Motorcycle Safety (ifz), of course, all year round, but especially on December 5 and 6, 2024, when scientists, researchers and practitioners from a large number of countries are invited by ifz in the setting of the motorcycle trade fair INTERMOT in Cologne to focus on the latest findings for safe scooter and motorcycle riding.

Of course, "Safety in Motion", the motto of the conference, is once again the program. At this World Congress for Motorcycle Safety, which will take place for the first time in December, international experts will provide up-to-date insights into safety-relevant developments in powered two-wheelers and at the same time open up future perspectives for safety on two wheels. For this reason, scientists, practitioners, politicians, employees of public authorities as well as representatives of the motorcycle industry as of today are called upon, to become part of the 15th International Motorcycle Conference.

You would like to actively contribute to the conference? Then please submit an abstract by April 10, 2024. Information on the submission and selection process, the content and about the conference in general can be found at www.ifz.de.

Always under the premise of optimizing safety on powered two-wheelers, we look forward to many interesting contributions.

Save the date: [December 5 and 6, 2024:](#)

The ifz's series of International Motorcycle Conferences has been setting standards for the interdisciplinary exchange of new research findings relating to powered two-wheelers for decades. Once again, the two days surrounding the INTERMOT motorcycle trade fair offer dedicated experts from research and practice an excellent opportunity to exchange information on the latest safety-relevant aspects of motorcycling.

In future, the INTERMOT motorcycle trade fair will take place annually in December. In 2024 from December 5 to 8.
